Official Assessment | ID# 319511

The Home Energy Score is a national rating System developed by the U.S. Department of Energy. The Score reflects the estimated energy use of a home based upon the home's structure and heating, cooling, and hot water systems. The average score is a 5. Learn more at HomeEnergyScore.gov.

HOW MUCH ENERGY IS THIS HOME LIKELY	TO USE?
Electric: 5,402 kWh/yr	\$737
Natural Gas: 442 therms/yr	\$517
Other:	\$0
Renewable Generation:	(\$0)
TOTAL ENERGY COSTS PER YEAR	\$1,254

How much renewable energy does this home generate?

THIS HOME'S CARBON FOOTPRINT:

What should my home's carbon footprint be? Between now and 2030, Portlanders should reduce carbon pollution per household to 3 metric tons per year to reach our climate goals.

- Actual energy use and costs may vary based on occupant behavior and other factors.
- Estimated energy costs were calculated based on current utility prices (\$0.14/kwh for electricity;
- \$1.17/therm for natural gas; \$4.00/gal for heating oil; \$2.43/gal for propane).
- Carbon footprint is based only on estimated home energy use. Carbon emissions are estimated based on utility and fuel-specific emissions factors provided by the OR Department of Energy.
- Relisting 2-7 years after the assessment date requires a free reprint of the Report from **us.greenbuildingregistry.com** to update energy and carbon information.
- This report meets Oregon's Home Energy Performance Score Standard and complies with Portland City Code Chapter 17.108.

S98 PER YEAR

TACKLE ENERGY WASTE TODAY!

Enjoy the rewards of a comfortable, energy efficient home that saves you money.

- det your home energy assessment. Done!
- □ Choose energy improvements from the list of recommendations below.
- Select a contractor (or two, for comparison) and obtain bids. If a new home, discuss with the builder. Checkout www.energytrust.org/findacontractor or call toll free 1-866-368-7878.
- Explore financing options at **energytrust.org**.

PRIORITY ENERGY IMPROVEMENTS¹

FEATURE Duct sealing

Water Heater

TODAY'S CONDITION⁴ Un-sealed Natural gas UEF 0.58 **RECOMMENDED IMPROVEMENTS³**

Reduce leakage to a maximum of 10% of total airflow When replacing, upgrade to ENERGY STAR, (EF>=0.67 or UEF>= 0.64)

ADDITIONAL ENERGY RECOMMENDATIONS ²

FEATURE TODAY'S CONDITION⁴ RECOMMENDED IMPROVEMENTS Envelope/Air sealing Not professionally air sealed Professionally air seal Ceiling insulated to R-38 Attic insulation Basement wall insulation N/A Air Conditioner N/A Duct insulation Insulated Wall insulation Insulated to R-15 Floor insulation Insulated to R-13 Foundation wall insulation N/A Heating equipment Natural gas furnace 96% AFUE **Knee Wall insulation** N/A Skylights Double-pane Solar PV N/A Windows Double-pane, low-E glass

- 3. If your home has an oil furnace it is recommended you replace it with a high efficiency electric heat pump.
- 4. Today's Condition represents the majority condition for that feature in the home.

^{1.} To achieve the "Score with Priority Improvements" all recommended improvements in the Priority Energy Improvements section must be completed. All together, these priority improvements have a simple payback of ten years or less.

^{2.} Additional energy efficiency improvements may take longer than ten years to make a return on investment but can have a significant impact on the comfort, efficiency and environmental impact of your home.
